1. 

Error

 An 

img

 element must have an 

alt

 attribute, except under certain conditions. For details, consult [guidance on providing text alternatives for images](#).
- From line 7, column 13; to line 7, column 153

```

```

Document checking completed.

## Image report

The `img` elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.

### No textual alternative available, not linked

The following images are not links and have no textual alternative available (no `alt` attribute), and are, therefore, not accessible to people who cannot see the images or understand the symbols in them.

An image belongs here if the image is significant (non-decorative) and the markup generator doesn't have knowledge on what the image is about available. For example, a photo gallery generator does not have textual alternatives available when the user refuses to provide them.

Purely decorative images should have the empty string as the textual alternative (`alt=""`), so it is a mistake for those to appear here. Also, when the markup writer knows what the images are about, (s)he should write textual alternatives.

Image	Location
Not resolvable	<a href="#">From line 7, column 13; to line 7, column 153</a>
