☐ CSS

```
<label for="password-confirm" class="sr-only float-start">Comfirm New Password</label>
<input type="password" id="password-confirm" name="password_confirmation" class="form-control" required>

<button class="mt-2 mb-4 btn btn-lg btn-primary btn-block" type="submit">Reset password</button>

<div class="auth-pages-link">
  <p>Already have an account? <a href="{{ route('login') }}" class="text-secondary">Sign in</a></p>
  <p>Don't have an account? <a href="{{ route('register') }}" class="text-secondary">Sign up</a></p>
</div>

</form>
</div>
</section>
</div>
@endsection
```

Check

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering 5 messages hidden by filtering

1.

Error

No space between attributes.

At line 8, column 83

ion="{{ route("password.update
2.

Error

Quote " in attribute name. Probable cause: Matching quote missing somewhere earlier.

At line 8, column 98

password.update") }}">
3.

Error

Quote " in attribute name. Probable cause: Matching quote missing somewhere earlier.

At line 8, column 103

ord.update") }}">
4.

Warning

Attribute password.update" is not serializable as XML 1.0.

From line 8, column 17, to line 8, column 104

<form class="form-reset-password" method="POST" action="{{ route("password.update") }}">
5.

Warning

Attribute }}" is not serializable as XML 1.0.

From line 8, column 17, to line 8, column 104

<form class="form-reset-password" method="POST" action="{{ route("password.update") }}">
6.

Error

Bad value {{ route for attribute action on element form: Illegal character in path segment: { is not allowed.

From line 8, column 17, to line 8, column 104

<form class="form-reset-password" method="POST" action="{{ route("password.update") }}">
7.

Error

Attribute password.update" not allowed on element form at this point.

From line 8, column 17, to line 8, column 104

<form class="form-reset-password" method="POST" action="{{ route("password.update") }}">

Attributes for element form:

Global attributes

accept-charset — Character encodings to use for form submission

action — URL to use for form submission

autocomplete — Default setting for autofill feature for controls in the form

enctype — Entry list encoding type to use for form submission

method — Variant to use for form submission

name — Name of form to use in the document.forms API

novalidate — Bypass form control validation for form submission

target — Browsing context for form submission

rel
8.
